

INFORMATION SECURITY POLICY

Kale Care Chemicals is committed to protecting the confidentiality, integrity, and availability of its information assets while conducting its operations. Our Information Security Policy has been established to ensure the operational continuity of the company and to comply with legal regulations and customer expectations.

This policy applies to all Kale Care Chemicals units and activities both domestically and internationally. It encompasses all employees, managers, contractors, and business partners.

Kale Care Chemicals is committed to the following:

- Regularly analyzing information security risks and establishing effective control mechanisms;
- Protecting information assets against unauthorized access, disclosure, alteration, or loss;
- Organizing regular training programs to enhance information security awareness among all employees and contractors;
- Investing in appropriate software and hardware by following technological advancements to ensure the security of company data and customer information;
- Fully complying with national and international laws and regulations related to information security;
- Continuously reviewing, improving, and enhancing the Information Security Management System (ISMS).

Our commitments will be achieved through specific objectives:

- Preventing 90% of information security incidents by 2026;
- Achieving a 100% completion rate of information security training for all employees by 2026;
- Ensuring information security risk assessments are conducted for all business processes by 2030.

This policy is implemented and monitored by a dedicated Information Security Team appointed by management. Each business unit will have an Information Security Manager responsible for overseeing the implementation of this policy.

The contribution of all parties is expected in the implementation of this policy. For any questions or concerns regarding information security, please contact the Information Security Manager at your facility.
